

RGT-1203

Product Description

LCD Display enhanced anti-interference needle detector

Product description:

A microcomputer touch screen interface operation system, combined functions of conventional anti-interference and reinforced anti-interference needle detectors, electronic detection data recording system and quality guarantee for enterprise product needle detection management and product quantity management.

Application:

Be applicable to detect broken needles in luxurious garments, underwear baby articles ,socks .etc.

Technical parameter:

Inspection width	Inspection height	Inspection standard	Volume	Approx weight	Power	Voltage
600mm	120mm	Fe \geq Φ 0.8mm	1580*980*890	180kg	60W	AC220V/50HZ
	160mm	Fe \geq Φ 1.0mm	1580*980*930			
	190mm	Fe \geq Φ 1.2mm	1580*980*960			
	230mm	Fe \geq Φ 1.5mm	1580*980*1000			

P.S. The inspection width and height can be customized.
