

# RGT-1607

## Product Description

### Enameled wire static friction tester

Display error	±0.001
Input power	ac220v±10% 50hz
Power consumption	&lt;30w
Outside size	670*460*400mm(L*W*H)
Weight	40 kg

#### Product description:

Enameled wire mechanical testing machine, apply to the new standards GB/T4074.3-1999, for nominal conductor diameter 0.050mm ~ 1.600mm, digital circuit control, led automatically display the static friction coefficient of the sample (tg α). High sensitivity and good reproducibility.

#### To meet the standard:

Fully meet the new standards GB/T4074.3

#### Applicable Industry:

It is the ideal test instrument for the manufacturers ,research ,product quality supervision,inspection industries and sectors.

#### Technical parameter:

Model	
Skateboarding tilt speed	1±0.2°/s
